7400E – 7600E – 7700E SERIES

MANUAL WIRE BONDERS

Triple Convertible Machine

Continuing a Tradition of Quality
**7400E · 7600E · 7700E Series**

**7400E - Conventional 45 Degree Wire Feed Wedge Bonder**
**7600E - Deep Access 90 Degree Wire or Ribbon Feed Wedge Bonder**
**7700E - Single Ball or Ball-Wedge Bonder**

**UNLIMITED DEEP REACH** access to remote bond targets on large packages with WEST-BOND’S new throatless chassis and micromanipulator designs. All machine components, circuitry and enclosures are arrayed above the horizontal bond plane, eliminating any restrictions to package size or shape. Manual “E” Series models are available for all microwave, semiconductor, R.F., and hybrid production, and are ideal for repair station or laboratory use.

**CONVERTIBILITY** for a variety of bonding methods is pioneered by West-Bond. A simple exchange of bond tool head or wire clamp assembly, provided with specified models, allows conventional 45° wire feed, deep access 90° wire or ribbon feed, ball bonding, insulated wire and single point tab/lead bonding. All programmed bond variables and machine settings for each tool head are retained in memory and retrieved automatically upon conversion.

**PROGRAMMING** for thirty different device types may be entered into separate buffers. Each device wire may have up to 21 stitch bonds with individual ultrasonic power, time, force (high or low) and loop elevation control data. Program values, action prompts, and fault diagnostics are exhibited on the easy to read 4 line, 40 character LCD sequentially with machine operation.

**FEATURES** include programmable dual force (high or low), pure vertical Z, pneumatic braking of all axes during bonding, and radiant tool heat. Available with or without the base and work platform for tabletop or conveyor system applications.
